TEN-TEN INTERNATIONAL NET, INC.

Official Publication of the Ten-Ten International Net, Inc. - www.ten-ten.org
Monitoring 28.380 and 28.800 MHz daily at 1800Z except Sunday

The Ten-Ten International News

Is published four times annually by the TEN-TEN INTERNATIONAL NET, INC. Publication dates are approximately mid January, April, July and October.

Each paid-up member will receive a copy. This publication is the property of Ten-Ten International Net and the contributors therein. Permission to reprint is hereby granted, providing suitable credit is shown.

News items should be sent to the Editor. Technical articles and information on all 10 meter activities or news are welcome and solicited. All copy submitted must be typed, and sent on computer disk or E-mail. Suitable formats will be provided upon request.

Photographs are encouraged. Black and White or Color are acceptable. Include complete information on the back of each photo. Attach a label or other suitable paper to the back of the photo and write all information on the label, not the photo. If sending digital images, high resolution of a minimum 300 dpi must be used. Please do not send newspaper or digitally printed photos as they cannot be used.

DEADLINE FOR NEXT ISSUE: 1 June 2023

PLEASE MAIL ALL ARTICLES AND PHOTOS TO:

EDITOR Ten-Ten News

From the Editor

Randy Mather, AJ7B
(#7675)

The turn out for the Winter Phone QSO party was a great start to this year's QSO Party schedule. Take a look at Dan's column to see the results of the 165 logs that were submitted for the Winter party. This is another good measure on how much 10-meters is opening up during cycle 25.

With Dan Morris' cooperation, I got to see how the "sausage is made" when processing logs submitted for a QSO Party. It's a pretty big task to take all the logs and review them for errors and then tabulate the scores and put it all the results together in a report for publishing both in this newsletter and our web site. My hat is off to you Dan for doing this nine or more times a year. While going through that process, I shared with Dan some ideas I had that might make processing QSO Party logs a lot less tedious. The Winter Phone QSO Party gave us a good sampling of different types of logs and submissions we would have to work with. To help standardize log submissions, Dan has written an article in this newsletter for people who use N1MM Logger for the Ten-Ten QSO Parties. If you use N1MM, you should read and take seriously the suggestions Dan is making. By following Dan's suggestions, you can help Dan make processing your log a lot easier.

You will also find in this newsletter a "how-to" guide on submitting applications for Bar awards. Those of you new to Ten-Ten membership will find this article helpful when you apply for your first Bar award. Something I think we will see a lot more of as the 10-meter band propagation keeps improving.

Pardon me a bit while I toot my own horn here. In the last two issues of 2021 and the first two of 2022, I wrote a series of articles on an Antenna Project I worked on with a friend of mine. As some of you have already noticed, that project got published in the March QST: "A Remote-Controlled Balanced Antenna Tuner." The important point to this is that you got to read about this project in the Ten-Ten International Newsletter FIRST. In fact, you got the complete story. Something that was way too big for a QST article.

So you see, creating a DIY article and publishing it in this newsletter my get you on the National stage. I just had to make a plug for articles to publish in this newsletter.

I hope to bump in to you on this year's Digital and CW QSO Parties.

Randy - AJ7B #7675

From the President

David Ruch NF0J
#19553

Hello from Elephant Butte. It has been a busy couple of months for me since assuming the role of President. Much to learn. Thanks to all for your help and encouragement.

Ten-Ten International had a booth at HamCation 2023, and it was great meeting so many members face-to-face for the first time. There was also membership renewal activity, and several non-members were interested in what we do, why we do it, and how to become a member. We had a good location across from the Flex Radio display and between QCWA and Elecraft's extremely popular booth. Thank you to members who stopped by and offered to help at our booth. A special thanks to Chuck, N7UQ, for delivering our booth materials, setting up the displays, working the show with me, and tearing down the display at the end.

A primary purpose of Ten-Ten International Net is to promote activity on the 10-meter band. One of the ways we do this is by sponsoring nine QSO parties each year. During the low point of the sunspot cycle, QSO party activity slows down, and eventually interest in participating is lost. As most of you know, 10 meters is back! Let's crank up our activity. Even if you make only a call or two, turn in your log!

We have a lot of new hams who are interested in making contacts on 10, and a good time for that is either on our nets or during QSO parties. If you were ever a new ham, you were probably like I was the first time answering a contest CQ: mike or key at the ready, hands shaky and sweaty, terrified that you'll make a mistake. You hear someone calling CQ and throw your call in. They answer you. Panic! In the end, it works out and you've made your first contest contact. Those of us who have many hours of contest experience need to remember our first time. If a new operator asks a question, take the time to answer. Help them learn, and they'll be back.

Since the early 1990s, Ten-Ten International has awarded college scholarships to amateurs around the world via the 10-10 Scholarship Foundation. This year's goal is to award \$2000 scholarships to three deserving hams. Funding for the scholarships is through members' donations, so I encourage you to consider a donation to the foundation. Small donations

are welcome, and I especially encourage those with lifetime memberships to get on board! Details about the 10-10 Scholarship Foundation and making donations are found in each issue of Ten-Ten International News. A history of the scholarship program by Larry Berger, WA2SUH, can be found in the October 2021 issue on page 10.

On a personal note, my new tower has arrived! I look forward to getting it and the KIO Hexbeam up in the air. It has been over twenty years since I was last able to have a rotatable antenna, and I can hardly wait. It should be up by mid-March. I'll announce on Facebook and the TenTenList when the tower is up. I lost all my logs before 2021 in the move to New Mexico, so even if you collected my number in the past, please give me a call when you hear me on the air so I can say hello and collect yours again.

Ten-Ten International will be present at Hamvention 2023, May 19, 20, and 21. Stop by your organization's booth (3810) to say hello and/or renew your membership. I look forward to seeing you in Ohio (and on the air)!

73

10-10 SCHOLARSHIP

FOUNDATION SUPPORTERS

We encourage all of our members to support the 10-10 International Net Scholarship Foundation. Our goal has always been to fund our scholarships entirely through member donations. At the Scholarship Foundation meeting last June, the Foundation Board voted to guarantee the funding for three \$2000 scholarships. The Foundation was created in 2001 and is a qualified 501(c)(3) tax exempt organization and contributions are tax deductible. Why not consider a donation as a Chapter or an individual in memory of a fellow ham or loved one? This quarter a donation was received from Arlene Schwartz, KE6GFI, #72985 in memory of Carol Bourne, N6YL, #1637. If you have an employer matching program, please let us know. If you haven't donated before, we want you to know that all donations are appreciated and they do add up. At the time you make a donation to your favorite charity, please consider a donation to the 10-10 Scholarship Foundation

If you make a donation of \$25 or more you are eligible to receive one of the historic 10-10 pins. As more and more members have told me not to send a pin and want the maximum amount of their donation to go to the students, if you have made a qualifying donation and would like a pin, please contact me at wa2suh@aol.com. To pay by credit card see our online payment information or send your check to me or the Data Manager. Our addresses can be found on Page 28.

The members listed below became 10-10 Scholarship Foundation Supporters during the months of December, January and February and we appreciate their support.

10-10 SCHOLARSHIP APPLICANT INFORMATION

Each year the 10-10 International Net, through our non-profit corporation, the 10-10 Scholarship Foundation, funds three \$2000 scholarships, which are administered on our behalf by the Foundation for Amateur Radio (FAR). It is suggested that every 10-10 member encourage qualified college-bound amateur radio operators to take advantage of this opportunity. Over the past 35 years, 10-10 has funded 133 scholarships valued at \$177,000.

Applicants must be licensed amateurs. There is no restriction on the course of study, but applicants must intend to seek at least an Associate Degree from a college or university. Non-U.S. amateurs and those seeking graduate degrees are also eligible, as well as students who study outside the United States. Initial applications must be received by FAR prior to April 15th of each year. Download an application from the

FAR website: <http://www.farweb.org> or request an application from:

GENERAL NEWS

1) After assuming the duties of chapter coordinator, I sent out email and/or snail mail to all listed active chapters for a response to correct any information listed. I received a response back from all but Ft. McHenry/Cornerstone/Yodar Kritch. If anyone knows something about this chapter, please let me know. **And again:** Please double check the TEN-TEN Net Guide to be sure your net(s) are listed correctly. If there are changes, be sure to let me know so I can update the list.

2) Reminder of Quarterly Reports Due: **In Extremis** (no report in over a year): Fort McHenry/ Cornerstone/Yodar Kritch, Major League Baseball, Speedway, Tango.

3) **Past Due** (no report received during the prior quarters when due): Down Under, New Mexico Mud Ducks. Reports received after February 28, 2023 (date of this report) are not included here and will be acknowledged in the Chapters section of the 10-10 website (see the date changes for acknowledgement).

4) See www.ten-ten.org/index.php/resources/ten-ten-documents/ten-ten-forms for a form to download or www.ten-ten.org/chapters/quarterly-report to fill out and submit electronically. Be sure to notify IT Manager Jeff, N7YG, before using this easy-to-use form so he can add you to the Chapter Management Group. If you do not have internet access, let me know and I will send you a blank form that you can copy and submit.

CHAPTER NEWS

1) Chief Seattle, I received a nice letter from Dan N7QHC. They have moved from Seattle to Snohomish, WA. Since the move band conditions have been very poor and operating conditions not much better, with a smaller lot and not much room for antennae. He is asking if anyone would like to take over as CM and/or call the nets. Someone with better equipment etc. Just to give all an idea of the issues he has reported that his net list is on a computer in a storage shed, he has a paper copy that shows last number listed as 3071, possibly more than ten years old.

2) Aloha, Another nice letter from Irene NH7PE. She says they have good activity in Hawaii for the net. They have had a recent surge in activity of folks looking to get their 10-10 numbers, so keep an ear out for HI. She has been a little stifled due to not having a computer and having to rely on one from the local library. Her electricity consists of solar panels and batteries. The Aloha net uses 28.484 as an alternate frequency, due to 28.490 being the DX calling frequency for Australia and New Zealand.

3) Branding Iron chapter is still without a Chapter Head. Peter, DL6DK, has agreed to continue as CM, but we need someone to come forward to become CH. Anyone willing to do so, please contact me.

4) **Down Under** CH Bob, ZL1AFU, reports that conditions are beginning to improve. Don't forget to keep an ear out for the down under folks.

5) **All chapters are asked to plan for succession of leadership.** To aid in such planning, IT Manager, Jeff, N7YG, has been setting up FTP accounts on the 10-10 server where chapters can save their data. **All CH:** contact Jeff for the details if you wish to take advantage of this opportunity.

6) I will leave this next info the same unless someone tells me different then I will correct for the next newsletter. Chapters below accept email upgrades as of November 27. All the listed chapters generally need previous, new and total points and seals claimed. Any transaction with the CM that requires that a certificate be issued, and most worksheet specials, should still be handled via US Mail. Also, it is good practice to keep a detailed listing of the upgrade in case the CM should require verification. This is especially true with Chesapeake Bay Chapter as some data was not transferred to new certificate manager. Requirements peculiar to a particular chapter are noted.

(** indicates change)

Bauxite – CM K5BKT, k5bkt@nwla.com. Bauxite and Arkansas Visitor numbers only.

Bay Area – CM K6RDK, k6rdk@arri.net

Branding Iron – CM DL6DK, bic-cm@voits.de

RULES FOR THIS EVENT AVAILABLE AT WWW.TEN-TEN.ORG IN THE QSO PARTY HANDBOOK

THE AMATEURS CODE by Paul M. Segal, W9EEA (1928)

The Radio Amateur is:

CONSIDERATE..... never knowingly operating in such a way as to lessen the pleasure of others.

LOYAL..... offering loyalty, encouragement and support to other amateurs, local clubs and the American Radio Relay League, through which Amateur Radio in the United States is represented nationally and internationally.

PROGRESSIVE..... with knowledge abreast of science, a well built and efficient station, and operation beyond reproach.

FRIENDLY..... with slow and patient operation when requested, friendly advice and counsel to the beginner, kindly assistance, co-operation and consideration for the interests of others. These are the hallmarks of the amateur spirit.

BALANCED..... Radio is an avocation, never interfering with duties owed to family, job, school or community.

PATRIOTIC..... with station and skill always ready for service to country and community.

DX News

Mike Davidson, N5MT
(#24949)

Welcome to the Spring DX season of the 10-10 DX News.

We had a nice Winter QSO Party in February with good signals from all over Europe and Asia. I had almost 300 Q's in my log but a Texas friend with a better antenna, talked with all 50 states, 68 countries and logged 1600 QSO's, came in first place again. The solar flux during the QSO party was 140 giving us excellent DX propagation on Ten.

The DXpedition to Bouvet Island was a big disappointment for many DX chasers in February with the bad weather around Bouvet! High seas caused dangerous boat landing conditions on the island. A few made it ashore with limited stuff and they put up two of the planned five stations. The resulting setup caused the QSO counts to be only 9% of what was expected to log with five stations. I did not hear any activity from Bouvet on Ten but they logged 675 QSO on Ten. Most of the Ten meter Q's were into Europe and Asia and only 2 Q's to North America. You will find some Bouvet videos on YouTube. This bad-luck DXpedition will be remembered and blame it on a lot of bad weather.

The Winter QSO party allowed my station to find 17 old DX members and 28 members that were a first time in my log! I got one three digit old member from the west coast for a new one. I worked a lot of non-members looking for numbers so they could get qualified to join 10-10. I think I talked with about 90 stations that were looking for numbers. I worked a total of 110 members and 185 non-members all weekend. I looked at our 10-10 database after the party and over 104 new member numbers had been added to the database! So thanks to all the new members and I have talked with two new members that joined from the QSO party in my log.

All members are having a good time with the rise in the solar flux due to more sunspots! The Sun gave us a solar flux high last year in September of 154 but a new high of 234 was recorded in January 2023. On Feb 17th a mistake was posted for a flux of 343 so please ignore that posting. We had many sun spots this past quarter on the Sun to cause the record solar flux. And more are expected this year!

Over 165 logs were submitted for the Winter QSO Party which was great

news for 10-10. Award forms and membership renewal info are at the website. Please swap your 10-10 number over the air on Ten to qualify for awards! When you collect 10-10 numbers, DX, Counties, Bars or you want your score to count in a QSO party, you must exchange your callsign, name, state and 10-10 number on Ten over the air. So save your QSO info in a logging program. Then when you are ready to fill out an award application, move your 10-10 info from your saved place to your award form. The honor system applies for all contacts on awards. I keep DX records for award validation as the DX Countries award manager. After filling out an award form, submit it to the email address on the form. There are 340 ARRL DXCC countries available but only 318 10-10 countries have been worked for country credit so far.

Countries Award: There were no Countries Award applications submitted this past quarter.

GENERAL 10-10 DX REPORTED IN THE PAST QUARTER:

3B9 Rodriguez Island. Robert **3B9FR** #61550 was active in January on Ten with FT8 from 1545 to 1715 UTC.

3D2 Figi. Wayne **N0UN** #11317 is now using 3D2UN from Figi. He is good on LoTW.

3Y Bouvet Island. A rare DXpedition to Bouvet started on February 6-13th. The only member was Bill **K07SS** #8631 and there was no report of any Ten meter QSO's by Bill. They made very few QSO's on other bands due to bad weather and bad landing conditions with high waves. In 1990, Bouvet was a first time country for 10-10.

5W Samoa. Paul **W7IV** #27182 and friends were on Savai Island from February until the 28th. The usual bands and modes plus FT8 were used. Call was 5W0DX.

9M2 West Malaysia. Rich **PA0RRS** #24343, was back in West Malaysia from January to March 27th using call 9M2MRS. West & East Malaysia are rare 10-10! No SSB, some CW but mostly FT8 around 28074 or 28180. **LoTW**.

9U Burundi. Elvira **IV3FSG** #54292 was in Burundi, Africa from February 4-27th as 9U5R along with a friend Vlad OK4WX/9U4WX. All modes all bands. A lot of FT8 from Elvira on Ten in February. The last 10-10 member to operate from 9U was Iris Colvin W6QL/9U5QL in February 1991. So this is a rare 10-10 country!

4U United Nations. The UN club station **4U1UN** #55555, in the New York UN building, was heard this past quarter. The remote HF station was on Ten along with the beacon on CW.

4U UN Switzerland. **4U1ITU** #11111. There was radio from the club station on 20 & 30 Mtrs and some on FT8 but nothing on Ten in February.

ET Ethiopia. Ken **K4ZW** #18573 and Nodir **EY8MM** #52767 were using the club station ET3AA during January. I saw the station active on Ten using FT8 in January from 1230 to 1430 UTC. I do not have individual info on each. Remember this is a rare DX location.

EY Tajikistan. Nodir **EY8MM** #52767 was active on FT8 in early January. He then went to Ethiopia but is now back in Tajikistan from February 17th.

FJ St. Barthelemy. Phil **K2LIO** #7746 left the island at the first of the year 2023 and has not returned. His new call FJ4WEB. His radio is an IC-7300 with a better antenna for Ten. Phil is the first 10-10 member to stay on the island for long periods.

HR Honduras. Gerard **F2JD** #63443 was on Ten using FT8 in mid January as **HR5/F2JD** from 1500-1600 UTC.

Alex **K6VHF** #77458 was on Roatan Island using call **K6VHF/HR9** from February 12-15th using FT8 and CW.

KH0 Mariana Islands. Gerard **W5TZX** #49308, was on the Mariana Islands in February. His radio was QRP 10 watts using FT8 on 20-15 Meters, no Ten. LoTW.

J7 Dominica. Laurent **F5MUX** #42039 used callsign J79BH on Dominica in late February. He has had eight callsigns over several years, so be careful.

PJ7 Sint Maarten. Gary **KC9EE** #16977 will be on the island from March 1-8th. His new call will be PJ7EE using a QRP radio on CW and FT8. LoTW.

V3 Belize. Walt **W0CP** #14291 is using call V31DJ until March 11th from Belize. CW, SSB and FT8. LoTW.

V5 Namibia. Mike **V51MA** #64688 has been showing up on 28450 on Saturday mornings at 1610 UTC with the LA Pelican Net. I just missed him on FT8 at 1945 UTC on Ten.

VP2M Montserrat. Thaire **W2APF** #50022 was using call VP2MDX from January 2 to March 30th. He operated CW & SSB into a hexbeam with a small amp.

VP8 Falkland Isl. Bob **VP8LP** #8854 was on Ten operating SSB from December to February. No LoTW.

YJ Vanuatu. Al **K7AR** #2736 and friend Bob W7YAQ were in Vanuatu in February for two contests.

ZF Cayman Islands. Jim **WB2REM** #48365 was on the big island using ZF2OO callsign until January. He was on Ten SSB and FT8. LoTW.

UPCOMING DX & NEW 10-10 ACTIVITY:

9G Ghana. A DXpedition of nine ops are going to Ghana from March 22- 30th.

Look for George **N4GRN** #73941, and Hal **W8HC** #12502. Special callsign is 9G4X for a contest.

CY0 Sable Island. The big DXpedition to Sable Island is scheduled for March 20-30, 2023. Look for Dan **W4DKS** #5395 and John **W2GD** #14109 the 10-10 members.

Website: www.CY0S.com. Sable island is now a remote WX weather station for Canada and does not keep anyone on the island for station keeping. The ham operators are going to rent Sable facilities where they can stay and operate. The only permanent residents on Sable are 500 horses and seals that have to be protected from visitors.

FP St. Pierre & Miquelon Isl. Eric **KV1J** #31247 is planning on a June-July 2023 trip to operate as FP/KV1J.

HC8 Galapagos Island. James **WB2REM** #48365 and friends are planning a March 1-11th trip. All bands, modes and digital FT8. Unknown callsign. LoTW.

J6 St. Lucia. Dan **W0CN** #27026 and Bill **K9HZ** #2618 will be back in St. Lucia from February 28th to March 7th and the ARRL DX SSB contest using J68HZ. Outside contest Dan may be using J68CN.

PJ2 Curacao. Andreas **DK5ON** #54260, will be on Curacao Island from March 4-22nd. All modes, LoTW.

V2 Antigua. Eleven operators will be using V26EI from Antigua from March 24 to April 2nd. The 10-10 members are Declan **EI9HQ** #71019 and Thos **EI2JD** #73610.

V3 Belize. Uwe **DL8UD** #70315, will be in Belize from September 6-14th. His new call will be V31KO or maybe V3O if they authorize his special request.

Download the DXbe.com/watch?v=GcbtTKSRkus'ers Handbook by Bryce Anderson K7UA/SK, at: www.K7UA.com.

Propagation: I expect the solar flux to range from 125-185 during the Spring, with a rise of flux. The 2023 Spring Equinox is Monday March 20th, and Spring starts for us in the northern hemisphere. The Earth is equally over the equator, giving us equal daylight/night time days. Cycle 25 started on November 17, 2019. There are 5 sunspots visible on the sun today with one near X class flare and 2 M class flares last week! Sunspots are seen by looking at the Sun and the flux is measured at 2.8 GHz.

The 2022/23 monthly **max** solar flux: Jan was 130, Feb 130, Mar 151, Apr 166, May 180, Jun 149, Jul 176, Aug 128, Sep 154, Oct 163 Nov 142, Dec 166, 2023 Jan 234 and Feb 215. **Average 163.**

The 2022/23 monthly min solar flux: Jan was 84, Feb 93, Mar 94, Apr 96, May 98, Jun 96, Jul 91, Aug 95, Sep 116, Oct 105, Nov 108, Dec 119, 2023 Jan 136 and Feb 134. **Average 105.**

On March 1st, the solar flux was 161, the A index was 24 and K index was 4. There have been many sunspots on the Sun and the past nine months with increased solar flux up 20-30+ points. The USAF solar flux forecast for March 1st to April 14th is from a high of 180 to a low of 140 with average flux at 162, which is a record high average.

My Prediction: Over the next three months, the best conditions on Ten could be: March 16-20th; April 12-17th; May 9-13th; and June 5-10th. For the USA, expect a 85% chance of DX to Europe, Asia, S. America or Pacific. Use the beacons 28.175-28.300 MHz to find if the band is open. If Ten is closed for SSB, go to 28074 and use FT8 for another Q.

Three new DX members joined in Dec 22 to Feb 2023.

Dec: none; Jan 2023: none; and Feb: Gilbert VA3NQ #78103, John VE3TG #78116 and Dan VE7VU #78121. The highest 10-10 issued is to Rick KX4PP #78154.

Thanks to the Daily DX by Bernie W3UR #25731 and the ARRL DX Bulletins. This DX News edition is my number 129th of DXing reports for the past 32 years. DX news to: Mike Davidson, 26274 Whispering Pines Ave, Denham Springs LA 70726 USA and Email: N5MT@aol.com .

10-10 SUPPLIES FOR LOCAL EVENTS

If you are current in your membership and want to represent 10-10 at a local event, supplies are available on request from the Supplies Manager, Mel, KD6DE (kd5de@ten-ten.org). This is a great opportunity to spread the word!

Dave NF0J #

RF SAFETY

RF Hazards come in two varieties. One is radiation. Current FCC regulations provide standards for safe amounts. Use the worksheets and analyze your station, even if you think you may be exempt by virtue of power levels and spacing. Be sure.

A second hazard comes from direct contact with antenna elements carrying RF currents. Ground-mounted verticals and inverted Vee ends provide the greatest hazards, since both children and adults can come into contact with them – either directly or with some implement having a long metal handle.

Isolate ground-mounted verticals with fencing or other barriers which are effective especially in preventing children from touching a potentially active antenna. A vertical in or adjacent to a children's play area may mean station silence during periods when children are present: if contact is not a danger, radiation may be.

Elevate and insulate horizontal antenna ends above the level where anyone can touch them with a metal rod. Never underestimate the ingenuity of a child with a small mean streak or a large curiosity.

STATION GROUNDING

Everyone is familiar with the need for a common ground bus for all station equipment with as short a lead as possible to a ground rod outdoors. If you have a tower, it should also be ground rodged. All ground rods (including the house ground at the electrical service entry) should be connected together by the largest copper wire you can obtain. Some folks use copper flashing cut into long strips. These days, braid is not recommended because its very large surface area open to weather deteriorates it quickly. Use solid mechanical connections, not solder (which melts in the presence of lightning like a teenager in the presence of a rock star: (instantly).

If ground rods are widely separated, add ground rods in a row from end to end, spaced about the length of each ground rod apart. This is not over-kill—just the opposite. It is over-safe by holding the resistance between everything in your house and shack at the absolute minimum. Even a slight resistance may give a lightning surge an alternative path to ground through your "stuff."

HOW-TO SET UP N1MM LOGGER+ FOR TEN-TEN QSO PARTIES

Just for everyone's information N3FJP's Ten-Ten QSO Party Program (most used by 3 to 1) and N1MM Logger+ are the two most used programs submitted for our Ten-Ten QSO Parties followed by WIN1010, 10qsologger and several other programs. N3FJP's program is a very minimal cost and N1MM Logger+ is free.

There are many different UDC's (User Defined Contests) or types of contests that can be used for the N1MM Logger+ contest logger. I have conversed with some people at N1MM who have helped me determine which UDC to use and how to set it up in order to get the required information not only in the cover sheet but in the main body of the file where the QSO records are listed. As it stands now, I get logs that use a number of different UDC's. The correct UDC to use for Ten-Ten QSO Parties is 1010RTTY. If it is not in your list of contests when you create a new log, please download it from the UDC page of N1MM and ensure it is put into the User Defined Contests folder. DO NOT use TENTENRTTY, that is an older UDC and the formatting is not correct. Even using the correct UDC there will still have to be some manual editing in the Cover Sheet info.

Anyone who currently has N1MM should already have your station information set up. There is one item that needs to be entered in there and that is the Ten-Ten Chapter affiliation. If you have a Ten-Ten Chapter affiliation you want to use (Branding Iron, etc), click on the Config tab and then select 'Change Your Station Data.' Since N1MM does not have a field for Chapter you must enter your Chapter affiliation in the CLUB field, EX: CLUB – BRANDING IRON. This information will always be put into the cover sheet info going forward. If you change chapter affiliation, make sure you change that data each time.

There is a standard Cabrillo format to use, however, depending on the contest the Cabrillo format changes. When participating in any of the Ten-Ten QSO Parties it is necessary to make sure you pick the 1010RTTY contest UDC from the list. Above is an example screen shot of how you should set up your event. Click on File > New Log or New Database, however you use your contest logger. I chose New Log in Database KZ3T.s3db. This window is where everyone needs to make sure everything is filled out correctly to have the same format.

Select Contest Type for New Log

Log Type: 1010RTTY | TenTen QSO Parties

Start Date: 2023-02-18 00:00:00

Total number of contacts in database: 64

Contest: Associated Files

Category: Show Setup Show Rules

Operator: SINGLE-OP State for Log Type QSOPARTY

Band: 10M Note - the program does not validate categories. Check the contest rules for valid categories.

Power: LOW

Mode: SSB

Overlay: N/A

Station: FIXED

Assisted: ASSISTED Time Category: N/A

Transmitter: ONE

Sent Exchange: DAN NC 41015 Omit RST. E.g. CQWW: 05 SS: A 56 EMA

Operators: KZ3T Update Ops from Log

Soapbox

OK Help Cancel

In the above example at the top, you see that 1010RTTY was chosen. The other fields are self-explanatory. Band 10M. Mode depending on the QSO Party. N1MM Logger+ does not have a 'Category' so you must use Power (for High, Low or QRP). You have to click on drop the down arrow under 'Station' to select Mobile and if a Club you will have to edit that manually under 'Station.' Now, this is important! In the 'Sent Exchange' field. Enter your name, QTH (2 letters, NC, DX, etc) and then your 10-10#. If you do not have a 10-10#, then enter 0. The next two you should enter your call sign for Operators and all comments go in the soapbox area.

Now for the entry screen. It should look like the one above:

The above should be self-explanatory with Call sign worked, name (as given over the air), 2 letter abbreviation for QTH (NC, WA, DX, etc), and finally 10-10# if any. PLEASE, if there is no 10-10#, enter a 0.

Also, this contest logger will flag dupes, so, if you are running a frequency and see DUPE in red letters, disregard logging. However, if you do log it check your log and make sure the contest logger entered a 0 for the score.

```

START-OF-LOG: 3.0

QSO: 28300 PH 2023-02-18 2314 KZ3T      DAN      NC      41015  IK4ABC      JOHN    DX      0
QSO: 28300 PH 2023-02-18 2314 KZ3T      DAN      NC      41015  N5AA       ED      TX      12345
END-OF-LOG:

```

Now, to the Cabrillo format with cover sheet information. Above is an example of what it should look like.

In the above example, LOCATION:, there will be a 2 letter state or country abbreviation. That needs to be replaced with the Call Area (ex. W4, W8 or DX for outside the US. CONTEST; you will have to fill in after TENTEN-(WINTER PHONE or whatever QSO Party it is). In the Category, if you operated Mobile or Club you will have to fill that in otherwise choose from what is listed on the 'Select Contest Type.' Notice what should go in the QSO part of the log after your CALL. The Name, QTH & 10-10# if available (otherwise a 0) was entered

earlier in the 'Select Contest Type' in the box labeled 'Sent Exchange.'

Now, there has been a new UDC added for the Ten-Ten Open Season QSO Party. This UDC needs to be downloaded and put into the User Defined Contests folder. The name of the UDC is OSTM-QP.udc.

Above is an example of the setup screen.

In the above example for Open Season, OSTM-QP was the UDC selected. Basically, all info would be the same for setup as it was in the earlier setup screen. Only exception is Mode will be PSK. Just ensure in the 'Sent Exchange' you enter your Name, 2 letter abbreviation for state or DX for country outside the US and Ten-Ten# if one is available or 0 if no Ten-Ten#. This UDC may show Name/SPC/0-0-0 but do not use that.

ARTICLES

If you have a Ten-Ten related adventure/experience you think would be good to share with the other members of the Ten-Ten International organization, please send your story to editor@ten-ten.org.

Call history UserText appears here when enabled.

The entry screen will be a bit different. In the above example first part is self-explanatory. Under ALL-CLUBS just enter the numbers you receive from the operator for Ten-Ten#-EPC#-P070# as received. If the station has no numbers then enter 0-0-0. In the points field enter the number of points according to how many numbers you receive. In this example, you would enter 2 for the two numbers you received. If no numbers at all (0-0-0) then enter a Zero (0).

Next is the log information screen.

2/23/2023 12:14:26Z Open Season Ten Meter Qso Party - KZ3T.s3db

MM-DD HH:MM	Call	Freq	M...	Name	E...	Comment	Pts
02-22 14:17	W1ABC	28300.00	USB	ED	MA	12345-1243-0	3
02-23 12:10	IZ3AAA	28300.00	USB	MARIO	DX	0-0-0	1

In the above example is what your log screen will look like. As you can see, when you entered a 2 for the points in your entry screen, the program will add the extra point for the contact automatically after you log the contact. In the case of no numbers you entered a zero (0) and when you logged the contact the program automatically accounted for the contact and added the extra point in there for you.

I believe this should get everyone going. I plan on using a compiler (Author Randy, AJ7B) to run these logs through. So having a fairly standardized format will hopefully alleviate most problems that may arise. We understand that there are going to be problems and we hope to figure them out as we go forward. It takes the end user to do their part ensuring they select the correct QSO Party (contest UDC) and then editing as necessary.

If anyone that uses N1MM Logger+ has anything to add to this, please let me know and I will try and get the information out to all that use this contest program. Together we should be able to make it a better contest program.

If anyone has any questions, please let me know.

TEN-TEN AWARDS

To apply for any 10-10 Award, paid-up membership is mandatory. You are not required to send in proof as the Awards Manager has the current membership database. All contacts made for any award must be legal 10-10 contacts (a full exchange of Call, Name, QTH and 10-10 number from BOTH members). An application listing the rules for each award is available from the appropriate Awards Manager listed at the end of the award listings. Please send your request with a #10 (business size) envelope, self addressed and stamped with one unit of first class postage (or enclose one IRC for GB Award), to the Award Manager for the Award you are interested in obtaining. Please no phone calls to Award Managers for an application or list of rules. Contact requirements and rules for all Awards are available on the 10-10 website at www.ten-ten.org

Ten-Ten Bar Application Submissions

A BASIC HOW-TO GUIDE FOR SUBMITTING BAR AWARD APPLICATIONS

Now that 10M band conditions are getting better and people are starting to make more contacts, we are starting to see a few more members submitting Ten-Ten Bar Award Applications. So, I thought I would put out a how-to guide, if you will, especially since we have many new members that have joined Ten-Ten during the bottom of the last solar cycle and have not really had an opportunity to learn more about how to go about submitting bar applications.

First, there are two Bars managers. I do the 100-900 Bar Awards and Rob, KE0MIZ is now doing the 1000+ Bar Awards. Bar numbers are not actually issued for the 100-900 bar awards, just a date of issue. Once a member attains the 900 bar all applications for 1000+ Bars will then be sent via email (if possible) to Rob, KE0MIZ. Rob will start issuing actual bar numbers for each bar award he issues in addition to the dates of issue. It is imperative that everyone, as best they can, keep track of their bar applications.

Anyone that has WIN1010, as long as it still works, has the means to submit Bar Awards. The future of WIN1010 is not known as the author is now an SK. Ten-Ten will try to revive WIN1010 or try and come up with another program to be able to keep track of awards. For now, there really is no program for keeping track of 10-10 bar applications. If anyone has Excel or LibreOffice, it is a pretty simple process to keep track of your bar award applications including duplicates. I have a template that anyone can use but it is very simple to create your own. If anyone would like a copy of the Excel template, just send me an email requesting the form. There is an official 10-10 Bar Awards Application form on the 10-10 web site. It provides all the information needed to submit a bar award.

First:

- All contacts must include 10-10#, call sign, name, QTH and date in 10-10# numerical order in increments of 100 at a time. Extra contacts are encouraged in case of errors.
- E-mail the application if at all possible and if not, then USPS is fine. It is much easier to get into an electronic form if sent via email.
- A 10-10# may be used only once in a bar award program.
- Let the awards manager know which bar application you are submitting for.

Most errors in bar applications are no more than typos and they are very easy to do. For instance, someone submits an application and shows a 10-10# as 41587 but it may really be 41687 based on the call sign, name and QTH. Same with the call sign. K1AAB instead of K1AB. Easy to do. All errors have to be corrected or send in an additional contact to replace any errors noted. It also must be emphasized that all information must be copied over-the-air. If you missed any of the information (Call, Name, QTH or 10-10#), it is not a valid contact. Please don't get the information from a QSL or email. That is not in the spirit of 10-10 operations.

Other Ten-Ten award applications are basically the same depending on the type of award in which certain information needed may vary. If there are any questions about Bar Award applications, please contact me for 100-900 Bars and Rob, KE0MIZ for 1000+ Bars via email and we will help out as much as possible. For other Awards like Counties, Digital, CW, etc. please contact that awards manager first and they can give you the most accurate information you need to submit for that particular award. Thank you.

Silent Keys

Mark Steele, KD2NOM
(#77596)

It is with sorrow that we note the following Ten-Ten members who are now Silent Keys. We extend our sincere condolences to the families and friends of those SK members whose calls and Ten-Ten numbers will forever be kept in the records of the Ten-Ten Net.

Thanks to Lee - K2HAT - #76138 for his efforts in helping me keep the sk column as up to date as possible.

Mark 73, KD2NOM #77596

ANTENNA SAFETY NOTES

Tower and Coax: Some studies have shown that the bulk of lightning current travels in the shield of the coax. A considerable voltage difference can exist between a tower leg and the coax braid if the first connection between the two is at the bottom of the tower. You may want to consider breaking your coax near the top of the tower, having one section to the antenna with the flex loop to accommodate rotation and another section down the leg of the tower. Securely fasten a plate to the tower leg and use a double female connector with chassis nuts (often called a bulkhead connector) to join the two coax lengths. This gives you a connection between the coax braid and the tower leg. This is not the only ground you should use, but an extra one.

Total Disconnection: During violent electrical storms, surges can enter the station equipment from several sources: the antenna lines, the AC power lines, and ground. When dealing with surges, do not think in terms of complete electrical paths. A surge can charge components, cases, and chassis, and create high voltages across components that are designed for low voltages. Hence, during violent storms, do a complete disconnect.

Outdoors, disconnect all antenna feed lines and reconnect them to a ground rod in the station ground system. Indoors, disconnect antenna feedlines from the station equipment. Unplug all equipment – or that power strip you use as a master switch. Most power switches are single pole, so one must unplug in order to break the neutral and ground line paths along which surges can travel. Also disconnect the station equipment from the master ground lead to the outdoor ground rod system. If you do some careful planning, you can make all these moves in under a minute. Just be sure that all the connections are accessible and require no tools to connection and disconnection.

While it may be true that a direct strike is rare, most damage occurs from nearby strikes that place heavy voltage surges on power lines, antennas, and the ground. You can do a lot to keep them outdoors, where they belong.

Towers: Towers, whether free standing or on the roof top, require some special thought. Too few hams actually study tower installation before putting up the first one. Here are some things to think about:

1. What are the requirements for the tower base, including the concrete, rebar, excavation, etc.? Never under-support a tower at its base.
2. What, if any, are the guying requirements? If a tower is a guyed model, install the guying system to at least the manufacturer's standards. Be certain that guys are correctly and adequately anchored – and that they do not present a hazard to those who use your yard. If the tower can use a building support, be sure that building is up to the job. Most roof-line facial boards on a house are not.
3. Where does the tower go? Place it where it cannot hurt neighboring property (or people) if the tower and antenna fall under the worst conditions imaginable. Also try to place it where it will not hurt your own home and family if it falls.
4. Where do the feedlines go? Be sure that feedlines do not create either an electrical or a physical hazard for family members or visitors.
5. What are the codes? The more urban your setting, the more you may be subject to codes and ordinances that require permits, special requirements (for example, conduit for control voltages over a certain value), inspections, and, in some cases, licensed installers. Do not under any conditions bypass these requirements. Investigate in advance to know what you have to do and what it will add to the cost of the installation.
6. What about intruders? Towers are in some places classified as attractive dangers, which is why they might be to a neighborhood child with an urge to climb. Hollering is a deterrent, but not protection. Consider fencing in or cladding the lower tower sections so that the tower cannot be climbed.
7. Are any of the tower conveniences dangerous? Crank-up and tilt-over towers are convenient, but usually rely on cables, pulleys, and gearing to go up, come down, and stay in position.

Analyze the stresses on these auxiliary parts to ensure that they can safely handle the loads. Develop a maintenance schedule for inspecting and for replacing cables before their lifetime is ended. If they die on the job, disaster often results.

Insurance: Carry all you can afford that may be relevant to hazards that antennas may present. However, never let the existence of insurance be a substitute for the best possible practice in the installation and maintenance of antennas and their supports. The lives you preserve may include your own and those of your loved ones.

This is not a complete look at all the facets of antenna safety. We have not even reminded you to keep your antenna and supports well away from power lines. But perhaps we have said enough to prompt you to do a periodic inspection of your own safety measures – and perhaps some reading into the handbooks and other literature. The three key words are these: protect, divert, and prevent.

L.B Cebik, W4RNL #41159 (SK)

ARTICLES

There is always a need for articles in the News. There have been a couple requests for Do-It-Yourself articles. If you have something you would like to see in print please feel free to submit it. The most popular articles seem to be those relating to antennas, DIY projects, and kit building. Send your submissions to editor@ten-ten.org.

2023 Ten-Ten QSO Party Schedule

Event	Dates	Postmark
Spring Digital	April 29-30	May 8
Spring CW	May 6-7	May 15
Open Season	June 3-4	June 12
Weak Signal	July 8-9	July 17
Summer Phone	Aug. 5-6	Aug. 14
Sprint	Oct. 10	Oct 18
Fall CW	Oct. 21-22	Oct. 30
Fall Digital	Nov. 11-12	Nov. 20
Anniversary (61)	Jan 1 - Dec 31	Jan 8, 2024
Meet the Volunteers	Jan 1 - Dec 31	Jan 8, 2024

WOULD YOU LIKE TO JOIN 10-10?

Here is what you need:

1. You must hold a valid amateur operator license.
2. Your valid amateur operator license MUST authorize or qualify you for unsupervised transmitting operations in the ten meter amateur band under your own personal call sign.
3. You must make contact with ten members of 10-10 and submit a log listing all contacts, their 10-10 number, call sign, name (as received on the air), date of contact, and QTH (state/province/country). The contact form and membership application is provided on the page that follows.
4. You must remit dues for one or more year's full membership. Fee schedule and payment information can be found in Section 2 of the page that follows.

TYPES OF MEMBERSHIPS

To become a member either fill out the form on the following page and mail to the Data Manager at the indicated address or go on-line to the 10-10 web page, www.ten-ten.org and follow the links from 'membership' to 'application' and select membership category.

Primary Membership

Primary membership is available with yearly dues, although there is a special incentive available when you pay for three years at once.

Family Membership

Family membership consists of a primary member and one or more family members who qualify as a 10-10 member (has made the necessary 10 contacts) and who reside at the same location and postal address. Family memberships run concurrently with that of the primary member. Add \$5.00 for each additional family member for each year. Only the primary member will receive a copy of the 10-10 News.

Life Membership

Life membership is available and may be paid in one lump sum or spread across two or three years. For information refer to the "Life Membership Application" form on the web or contact the 10-10 Data Manager.

Senior Life Membership

Senior life membership is available to anyone who is currently 65 years of age or older. Payment can be made as one lump sum or within a one year period. For information refer to the "Life Membership Application" form on the web or contact the 10-10 Data Manager.

Family Life Membership is no longer available

Club Membership

Club membership is available to any Amateur Radio Organization which holds a valid Amateur Radio License. Application must be made by the club trustee. Dues are the same as the Primary member. No family or life memberships are available. Clubs have all the same rights and privileges as primary members except the right to vote in elections.

Electronic Membership

Electronic Membership is available to anyone who qualifies for any of the types of membership listed previously. Electronic membership means that all communications, including the 10-10 NEWS, from 10-10 to the qualifying member will be conducted via email distribution. The exception to this policy is when a member qualifies for a certificate from either one of the various QSO Parties or from one of the Awards programs.

MEMBERSHIP RENEWALS

Either fill out on the following page the top half of Section 1, including your 10-10 number and Section 2 and mail to the Data Manager at the indicated address or go on-line to the 10-10 web page www.ten-ten.org and follow the links from 'membership' to 'renewals' and select the membership category.

DATA MANAGER SERVICES

Call/Name/Address Changes

All changes are to be sent to the 10-10 Data Manager. Please include your address label (or a copy) with necessary corrections. This also can be accomplished at www.ten-ten.org using the membership/update link.

All payments may be made by Check, or Money Order. Due to banking regulations Credit Cards cannot be accepted for merchandise. Membership Services and Scholarship Donations can be made via credit card using the secure shopping cart at www.ten-ten.org

Mail to:

Data Manager, 10-10 International Net, Inc.
1349 Vernon Terrace
San Mateo, CA 94402-3331

SCHOLARSHIP DONATIONS

Donations to the 10-10 Scholarship Foundation are encouraged by our members to help fund three \$2,000 10-10 Scholarships to be awarded. For donations of \$25 or more you are eligible to receive a current year's lapel pin as a thank you gift. To pay by credit card, see the payment information on page 31. Your check should be made payable to the 10-10 Scholarship Foundation and sent to the Data Manager (address shown above) or the Scholarship Manager:

Larry Berger, WA2SUH
10-10 Scholarship Manager
9 Nancy Blvd.
Merrick, NY 11566-3119

TEN-TEN QSO PARTY RULES

5.2 10-10 QSO PARTIES

10-10 QSO Parties are events that are held for fun and to meet old, new and prospective members around the world. The rules listed here are for all general QSO parties. The Spirit of 76 and Open Season QSO Parties are specialty events and do have additional rules. The Anniversary and Meet the Volunteers are year long contact events.

5.2.1 WHO IS ELIGIBLE?

QSO Parties are open to all amateurs with operating privileges on the 10 meter band, however, logs will be accepted only from active members as of the date of the event with the following exception: Open Season event logs will be accepted from all amateurs. Other logs received will be handled as check logs. Check logs are used to validate (check) other logs, but do not qualify the sender for any awards. A QSO Party contact log submitted by an Amateur that intentionally submits erroneous contact information to cause errors on membership applications and awards will be considered an invalid log. Ten-Ten will not accept any log of contacts from an Amateur who had his or her membership/1010 number revoked.

5.2.2 WHEN ARE THE QSO PARTIES?

There are currently nine QSO Parties held throughout the calendar year:

Winter Phone - held on the first full weekend in February

0001 UTC Saturday through 2359 UTC Sunday.

Spring Digital - held on the last full weekend in April.

0001 UTC Saturday through 2359 UTC Sunday.

Spring CW - held on the first full weekend in May.

0001 UTC Saturday through 2359 UTC Sunday.

Open Season (PSK) - held on the first full weekend in June

0001 UTC Saturday through 2359 UTC Sunday.

Weak Signal - held on the second full weekend in July - 0001 UTC Saturday through 2359 UTC Sunday.

Summer Phone - held on the first full weekend in August.

0001 UTC Saturday through 2359 UTC Sunday.

Sprint - a 24 hour event held on October 10th (10-10).

0001 UTC through 2359 UTC.

Fall CW - held on the third full weekend in October.

0001 UTC Saturday through 2359 UTC Sunday.

Fall Digital - held on the second full weekend in November.

0001 UTC Saturday through 2359 UTC Sunday.

5.2.3 FREQUENCY AND MODES

Direct unassisted contacts only are permitted. Repeater, Satellite, IRLP, Echolink, or any other similar type of assisted contacts are NOT allowed. Based on the appropriate band plan for the country of operator, CW QSO Parties should be operated in the CW area of the 10-meter band and operated using CW only. Digital QSO Parties should be operated in the digital area of the 10-meter band and operated using Digital modes only (RTTY, PSK, etc). Phone QSO Parties must be operated in the PHONE area of the 10-meter band and may be operated using any approved method (SSB, FM, AM). The SPRINT utilizes all operating modes in the 10-meter band.

5.2.4 ENTRY CLASSIFICATION

Entrants may submit a log in ANY of the following classifications:

QRP: Includes single station operators and can also include OM/XYL teams or any families or groups of people using individual call signs and 10-10 numbers. CW/Digital/RTTY operations max 5 watts and Phone operations max 10 watts during the entire event.

LOW POWER: Same as QRP listed above except that output power for CW/Phone/Digital/RTTY operations is max 150 watts during the entire event.

HIGH POWER: Same as QRP listed above except that output power for CW/Phone/Digital/RTTY operations is greater than 150 watts during the event.

CLUB: A Club must have a valid club station license issued by their National Licensing Authority and must have an active 10-10 membership. Club entries must list the call, name and 10-10 number (if any) for all operators using the club call. Club operations will take place at one location using one set of equipment. Operators entering under a club entry may also enter an individual log for contacts made using their own call sign.

MOBILE: A mobile applies to car, truck, RV, motorcycle, boat, airplane or other mode of transportation. Use of a base station antenna, amplifier or commercial power is not permitted. Operation while your vehicle is parked across a county line, occupying two counties, counts as two counties and two contacts. Marine and aeronautical mobiles must be able to establish counties of operation. Safety is paramount while operating mobile. If you are unable to park near multiple county lines due to safety issues (i.e. on a bridge, on a freeway, etc.), please move to the closest area which would provide the best operating conditions and still be able to give out multiple counties. Duplicate entries are allowed when working in multiple counties. In addition to the normal log information provided the County Worked from and County worked must also be included. Mobile stations will receive awards within their own category and will not be included in the individual sections or Top Ten in the World. **Mobile entries will only be accepted for Winter & Summer Phone and 10-10 Sprint QSO Parties.**

5.2.5 TRANSMITTER INFORMATION

An operator may operate mobile, portable or fixed. If they change their exchange QTH during the QSO Party, the operator must show same in their log. The operator may enter a log from one call district, province, or DX country. Multi-transmitters (two or more transmitters operating simultaneously, sharing one call sign) are NOT permitted in any QSO Party. No matter your physical location, your QTH is the location of the transmitting antenna.

5.2.6 EXCHANGE

10-10 members send call sign, name, 10-10# and QTH (State, Province or Country). If received exchange does not have a 10-10#, then record a zero (0) in the log.

5.2.7 QSO POINTS

Two (2) points are awarded for contacts WITH a 10-10 number. One (1) point is awarded for contacts WITHOUT a 10-10 number. Duplicate entries should be retained in log and show a zero (0) for points. Any log showing 10% or more errors may be handled as a check log. A station may be counted only once regardless of mode except during certain specialty events.

5.2.8 CHAPTER SCORE ASSIGNMENT

Any entrant who is a chapter member may assign his/her score to that chapter. QSO Party chapter scores for the Sprint and Open Season may not be assigned.

TEN-TEN QSO PARTY RULES

5.2.9 QSO PARTY ENTRIES

Logs shall be forwarded to the QSO Party Manager as identified in the 10-10 NEWS or on the 10-10 web site. It is strongly suggested that logs be sent as soon as possible after the close of the event. It is also recommended that DX logs should be sent AIR Mail to insure they are received in good time. Any logs received with a postmark date AFTER the deadline date will be handled as a check log. Any logs received more than 8 days after the entry deadline, regardless of postmark, will be discarded. LOGS MAY BE SENT VIA Email to tentencontest@ten-ten.org. Q95 files are not a proper format nor are they readable, therefore, they will not be accepted.

5.2.9.1 ENTRY DESCRIPTION

Entries must contain a Cover Sheet, Log and Dupe Sheet as described here: COVER SHEET will list the Event Entered, Entry Classification, US Call Area (W0-W9 or DX Country), Chapter Score Assignment (if any), number of contacts and points with 10-10#, number of contacts and points without 10-10#, and total contacts and points claimed. LOGS must be listed in date/time order and list UTC Date, UTC Time, Call, Name, 10-10# (zero (0) if none), QTH and Contact Point Value. A DUPE SHEET is required for any logs exceeding 50 contacts. It may be either a list of all calls contacted in call sign order or hand entered on a dupe sheet grid.

5.2.9.2 ENTRY DEADLINES

Entries for all QSO Parties listed EXCEPT the Sprint shall be postmarked no later than 8 calendar days (this will always be a Monday) after the close of the event. Entries for the Sprint (held on 10/10) shall be postmarked no later than October 18th, unless that day falls on a Sunday or holiday, then the postmark deadline shall be October 19th.

5.2.10 QSO PARTY RESULTS AND AWARDS

QSO Party results will be posted on the 10-10 web site about 15 days after the closing deadline for the event and also printed in the 10-10 NEWS in the appropriate issue. Awards will be issued by the certificate manager for Top Ten Individual scorers in the World, the top individual scorer in each US Call Area (W0-W9), each DX Country, and for top QRP, LOW POWER, HIGH POWER, CLUB, MOBILE and CHAPTER. Electronic certificates will be sent to the 2nd and 3rd place scorers in these categories.

5.2.11 ANNIVERSARY and MEET THE VOLUNTEERS EVENTS

These events run from January 1 0001 UTC to December 31 2359 UTC. In the Anniversary event, entrants may submit a log of contacts with members that have the anniversary year contained in their membership number. Example: 2022 is the 60th anniversary year of 10-10 International Net, Inc. Contact with members containing a "61" in their membership number (i.e., 72061, 69615, 66154, 61126, 00607) would count toward the event. Each year the anniversary number changes, making a new group of members the focus of the event and promoting the use of the 10-meter band. All general rules are applicable with the following exceptions: During the calendar year (January 1 through December 31) make legal 10-10 contacts with 10-10 Number, Date, Call Sign, QTH with members containing the anniversary year in their membership number as described above.

In the MEET THE VOLUNTEERS event, entrants may submit a log of contacts with members listed in the 10-10 NEWS as being a 10-10 volunteer. One contact per volunteer is permitted, regardless of mode of contact. In both events, contacts must be made on the 10-meter band with any legal mode (AM, SSB, FM, PSK, CW, etc.). All submitted logs

must contain only one entry for each 10-10 number contacted. Contacts MUST be listed in 10-10 number order and each entry must list the 10-10 Number, Date, Call, Name, QTH and Mode, in that order. These events are for Individual entries as described in section 5.2.4 and certificates will be awarded for the TOP Ten, however all entrants will be listed in the 10-10 NEWS.

Logs MUST be postmarked no later than January 8th of the year following both the Anniversary and Meet the Volunteers events. Only members in good standing (with dues paid) are allowed to submit logs.

5.2.12 WEAK SIGNAL QSO PARTY (WSQP)

This event was added to help promote digital activity on the ten-meter band. The event in no way affects or modifies the policies for other scheduled Ten-Ten events. All weak signal modes for this event include: FT/JT/JS8/JS8CALL and any future weak signal mode. No repeater, cross-mode or cross-band contacts allowed.

FT4 (28.180)	FT8 (28.074)
JT65 (28.076)	JS8/JS8CALL (28.078)

Entry categories: QRP – Maximum 10 watts output.

Low Power – Maximum 150 watts output.

Exchange: 10-10 members should send call sign, name, 10-10# and QTH (ST/Prov/Country). Received exchange should include normal exchange for FT/JT/JS8/JS8CALL modes and for extra points name, QTH and 10-10#. Scoring will be 1 point for contacts without a 10-10 number and three (3) points for contacts with a valid 10-10# exchange. NO MULTIPLIERS! All other normal rules apply. Logs shall be forwarded to the QSO Party Manager..

5.2.13 10-10 SPRINT (October 10) QSO PARTY

An award will be issued for working all 10 USA Call Districts.

5.2.14 W6OI SPECIAL EVENT

This event has been postponed until further notice.

This special event operation is where volunteers operate the 10-10 official club stations (W6OI/VE9TEN/DL0X) seeking to work anyone anywhere. Any mode of operation is permitted. Many operators will be authorized to operate W6OI from most US states and VE9TEN from various Provinces/Territories simultaneously. DL0X is operated by Henry, DL8YBM. The purpose is to have fun promoting 10-meter activity making contacts with 10-10 members and of course, non-members. This is a great way to increase membership! Exchange is similar to any 10-10 QSO Party event - name, call, QTH, and 10-10 number if one is available. As contacts are made, provide info on the 10-10 organization and where to find our website - www.ten-ten.org. If anyone wants to volunteer to operate W6OI during this event contact Jerry, N9AC. Members in Canada should contact Rob, VE9KM for permission to operate VE9TEN.

5.2.15 FOR MORE INFORMATION

Current information about 10-10 and upcoming 10-10 QSO Parties and events are always available on the 10-10 web site. Cover sheets, logging forms and dupe sheets are also available for downloading or printing at <http://www.ten-ten.org>. Any unanswered questions regarding the QSO Party rules may be forwarded to the QSO Party Manager.
